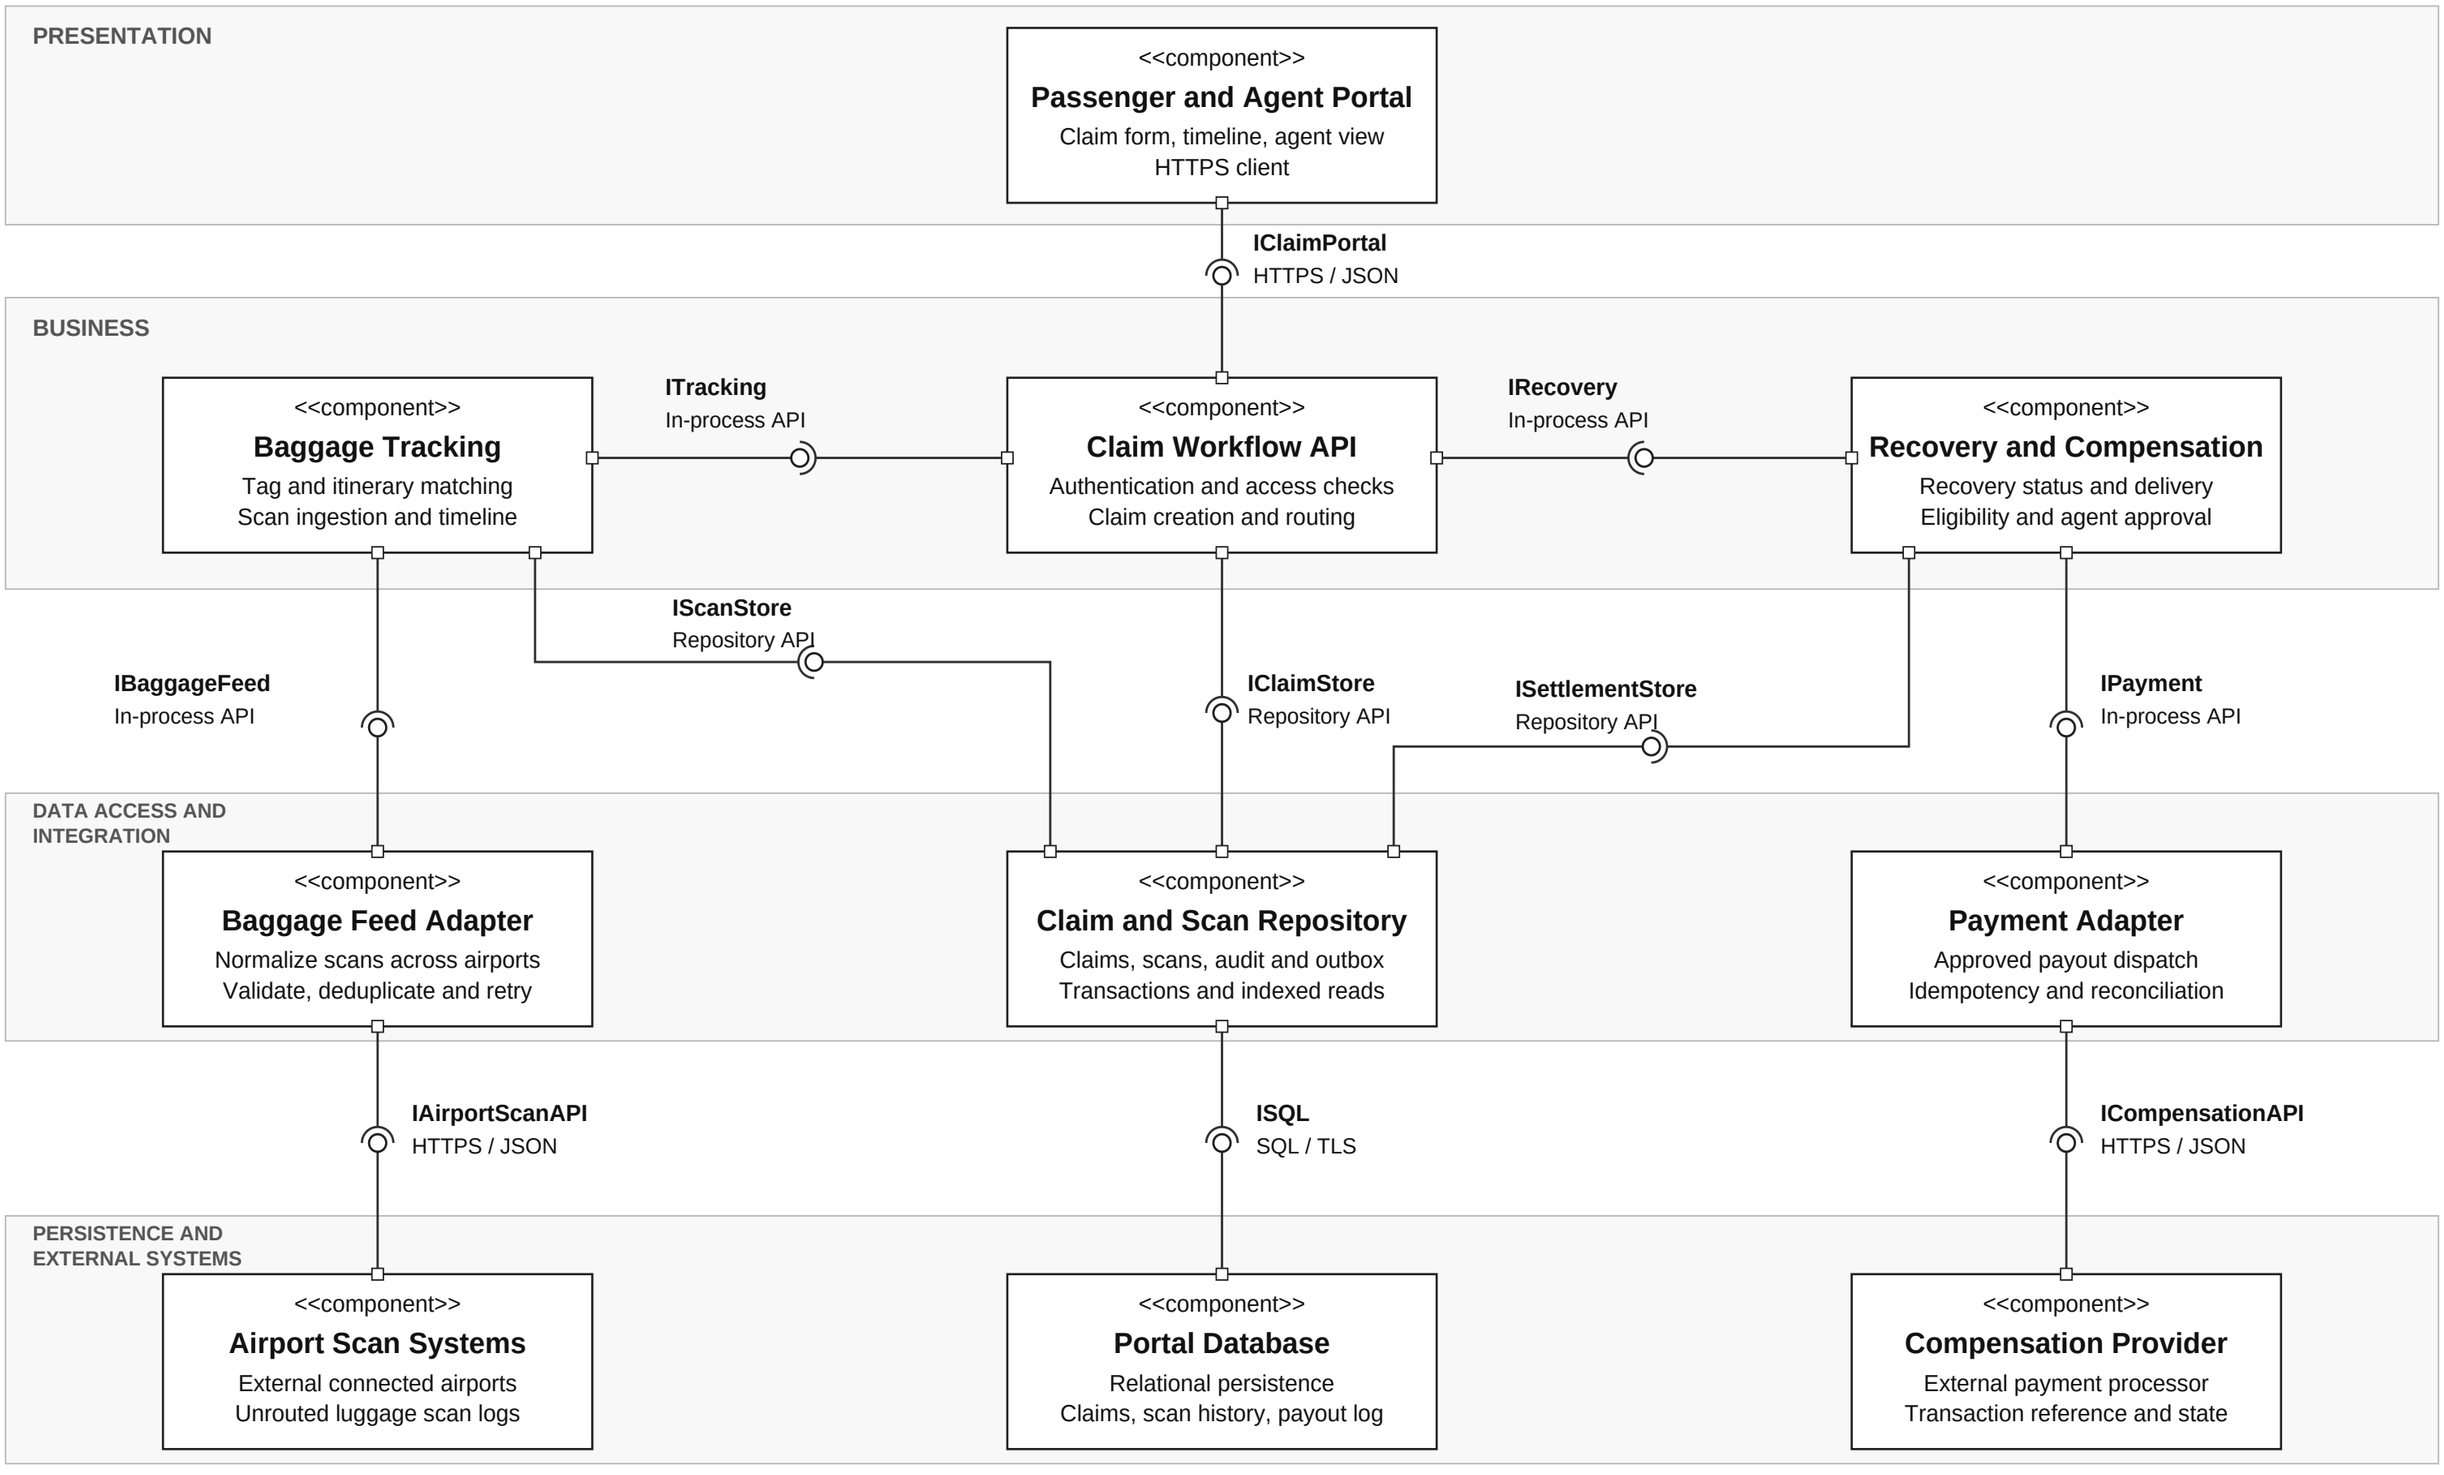
Airport Lost Luggage Claim and Tracking Portal

Lab 3 UML Component Diagram

PES1UG24CS579 | Mohammed Zahoor Mashahir | Problem 30



Notation — Provided interface — Required interface — Port — Solid ball-and-socket connections are UML assembly connectors.

Requests travel from the requiring socket to the providing ball; results return in the opposite direction.

Business and repository interfaces are in-process. External APIs and the database cross deployment boundaries. See README for flows and contracts.
